Fire Safety Systems	
<p>Fire Warning System:</p> <p>Smoke alarms fitted to the kitchen, barn room and toilet area around the yard.</p>	
<p>Escape Lighting:</p> <p>None</p>	

FIRE SAFETY RISK ASSESSMENT

Other Fire Safety Systems: (e.g. sprinklers)

Fire extinguishers available in the big barn and in the barn kitchen. Fire blankets available by each cooker in the kitchen.

FIRE SAFETY RISK ASSESSMENT

How a Fire Could Start

Fire could start in places where igniting items are used, and flammable materials are nearby. The workshop room houses fuel for the machinery as well as power tools. The use of power tools in this enclosed space near the fuels is one way for a fire to start. Cigarette butts inappropriately disposed off could also cause items such as hay and straw, common in farming areas, to come alight. Faulty electrical items and unsupervised fires are ways a fire could start and spread.

People Affected by Fire

Clients and staff as well as visitors and neighbours of Apple Tree Farm could all be affected by a fire on our premises. Also our animals and passers-by on the road adjacent to the farm could also be affected.

Staff Training

Staff to be trained in fire prevention, evacuation and on how to deal with an incident. There must always be one member of staff on site at all times who is first aid and evacuation trained.

FIRE SAFETY RISK ASSESSMENT

Escape Routes

All doors and escape routes are to be kept clear always. When in use, The Barn room must have the stable doors always unlocked.
Cars are to be parked appropriately and not causing an obstruction in the driveway or gateway.

Fire Alarm

Fire alarms to be tested regularly and batteries replaced as needed.

Fire Extinguishers

Fire extinguishers to be available in each barn with the corresponding instructions.
Fire extinguishers to be maintained and inspected as required.

Fire Action

In case of a fire, dedicated members of staff will assist in the evacuation of the most vulnerable individuals and those in need of help with mobility.
Evacuation is to be initiated immediately and all persons in the premises are to meet in the dedicated assembly point and wait for further instructions.
A dedicated fire officer will ensure all individuals are accounted for.

Assembly Point: Entrance to the farm, by the letterbox.

Animals: all animals to be moved to a field of safety using the designated run system around the farm, in a calm manner.
